FOR IMMEDIATE RELEASE

Software Corporation International Announces New Company, SCI Fusion360

CHARLOTTE, NORTH CAROLINA, March 7, 2011 --- Michael D. Nash, Chairman of the Board of Software Corporation International (SCI), announced a new initiative to be delivered by a recently created affiliate, SCI Fusion360.

Fusion360 will focus on addressing the current shortcomings of software development. Our team is comprised of software development resources and management with extensive experience in both onshore and offshore development, and provides cost-effective solutions to all software development projects. Clients using Fusion360 have access to innovative development, sourcing, and management methodologies, providing project flexibility while lowering risks and decreasing overall project costs. Fusion360 ensures success by applying decades of experience to today's dynamic environment.

Fusion360 offers an extensive range of architecture, design, development, and programming services from the simplest of applications to the most demanding multilevel, real time applications. We work with our clients to clearly define development objectives and deliver cost effective solutions.

Fusion360, through the use of multiple partners, is positioned to rapidly source any project. We are focused on development excellence, leveraging onsite, onshore, and offshore resources, where appropriate. Our objective is to exceed our clients' expectations every day and to assist our clients in exceeding their IT goals.

"Today's software development environment has multiple shortcomings, and Fusion360 was established to address these and provide our clients with timely, cost effective solutions to their development initiatives," stated D. Keith Sides, President & Chief Operating Officer, SCI.

Fusion360 offices are located at 301 McCullough Drive, Suite 442, Charlotte, NC 28262. For more information, please contact D. Keith Sides at 704-788-4400 or keith.sides@sci-solutions.com.
